

Invent your own computer game

- Computer games are everywhere: on phone apps, games consoles, laptops, even on smart TVs.
- There are huge games development companies who create the large budget, slick games that everyone wants to play.
- However, many successful games, especially apps, have been developed at home by youngsters. All you need is a great idea and some programming skills.
- All entries need to be sent to Mr Kemble
- Kemble.m@mar.mmat.org.uk by Friday 11th June

Start by generating your ideas

What genre of game do you prefer e.g. racing, sport, MMO, first person shooter etc:

What features do you think make a fun and addictive game?

Imagine that you were going to develop a new game and sell it as an app so that people could play it on their phones and tablets.

What type of game app would you like to develop?

What age range would you see your game appealing to?

Next steps....

Think of a name for your new game

Describe what will happen in your new game.

How will the points and levels system work?

Draw a scene from your game

Draw a character from your game
