

Pre-release & revision

Geography Learning Journey

What fieldwork methods can be used to investigate how a river changes with distance downstream?

How reliable were your fieldwork methods and conclusions?

What are megacities?

What opportunities and challenges are there in Lagos?

How can squatter settlements be managed?

Why are there global variations in economic development?

How can we reduce global economic inequality?

What is Nigeria like, and how is it changing?

What are the impacts of TNCs locating in other countries?

What strategies can be used to reduce the risk from floods?

Urban Issues & Challenges: (Lagos)

Development & Nigeria

River Landscapes

Why is the number of people living in urban areas growing?

Why are people moving to Lagos?

How can urban planning improve quality of life?

How is traffic managed in Lagos?

Can going on holiday help to reduce the development gap?

What are the effects of economic development on the environment and quality of life?

How do physical and human factors affect the risk of floods?

What causes flooding?

How do rivers change as they flow downstream?

What are the causes & impacts of economic change in the UK?

Why is Liverpool an important city, nationally and internationally?

What has been the impact of migration on Liverpool?

How successful have urban regeneration projects been?

How are beaches formed?

How can coastlines be protected?

How do rivers change as they flow downstream?

Urban Issues and Challenges (UK & Liverpool)

Coastal Landscapes

YEAR 11

How is the UK linked to the wider world?

How has urban change created opportunities in Liverpool?

How has urban change created challenges?

How can urban living be more sustainable?

Which processes help to create coastal landforms?

What are the processes of erosion and deposition?

What are UK coastlines like?

What landforms can be created by the processes of erosion and deposition?

Why don't all areas of the world have access to energy?

What effects does extreme weather have on people in the UK?

Is the weather in the UK becoming more extreme?

What are the characteristics of tropical storms and how do they form?

Why do people live in tectonically active areas?

How do the effects of natural hazards vary around the world?

What are the characteristics of hot deserts?

Why are tropical rainforests important?

How have plants and animals adapted to ecosystems?

What are the impacts of new strategies being used to increase energy supply?

How is the demand for food, water and energy changing in the UK?

Hazards & Extreme Weather

Living World

YEAR 10

How extreme can the UK weather be?

What effects can tropical storms have?

How does global atmospheric circulation affect the climate and characteristics of places?

What is plate tectonic theory?

What are the risks of desertification? And how can these risks be managed?

Why are tropical rainforests under threat? How can this threat be managed sustainably?

What is an ecosystem and where are the global ecosystems?

Why is there an increasing demand for energy?

Where are the global inequalities in access to resources?

Resource Management & Energy

What does an earthquake have to do with development?

Is global trade unequal?

How does tourism help Kenya?

Do the Ural mountains shape Russia's identity?

Why do Russians live in Siberia?

Who was Alexei Navalny?

Why do volcanoes and earthquakes happen?

How can people reduce the effects of volcanoes and earthquakes?

What are the effects of climate change?

Can we stop climate change?

An unequal world?

Russia

Tectonics

Climate Change

Why are some places more developed than others?

How can the development gap be reduced?

What is Russia like?

Why is Kaliningrad important to Russia?

What are Russian attitudes to homosexuality?

Is Russia a superpower?

How bad are the effects of earthquakes?

What is a tsunami?

What is the evidence that climate is changing?

How can we adapt to live with the effects of climate change?

YEAR 9

Cracking Coasts

Raging Rivers

How can we measure development?

Should coastal areas be protected?

What processes shape coastlines?

How was Old Harry formed?

Should we build on floodplains?

Why are rivers so important to people?

How do rivers change as they flow downstream?

What processes shape rivers?

How does water get into a river?

What is the Israel-Palestine Conflict?

Why is oil regionally and globally important to the Middle East?

What happened in the Turkey-Syria earthquake?

YEAR 8

Wild Weather

Asia's Population Pressures

Exploring the Middle East

What is the weather?

What are the effects of climate change?

What are the effects of tropical storms?

How is Asia's population distributed?

How and why has China's population been controlled?

How have Natural Hazards affected populations?

How is the population of the Middle East distributed?

What is the climate of the Middle East?

What impact can leaders have on a country?

Why did the River Nile flood?

How diverse is Africa?

Can we save the rainforests?

Why are rainforests so important?

What are the impacts of tourism in Peru?

Why do people migrate?

What is it like in South America?

Why are maps useful?

How has the UK's population changed?

What is a Geographer?

Exploring Africa

Exploring South America

Becoming a geographer

YEAR 7

How developed is Africa?

How did the Atlas mountains form?

What are the causes and effects of deforestation?

What is it like in a tropical rainforest?

Is South America a dangerous place to live?

Favelas: a city within a city?

How do we find places on a map?

What is the UK like?
