

Year 7 - Photo Holder

Progress Page

Working Towards	Expected Standard	Reaching Greater Depth	
To achieve 'Expected Standard' you can....		WT	ES
ES1. Research different animals and complete simple drawings in your booklet including colour.			
ES2. Design your photo holder using the full space on the page, adding colour and some simple labels.			
ES3. Name and give correct uses for the tools and machinery needed for this project.			
ES4. Use the correct tools to draw a curved shape on a piece of wood and cut it out within a 5mm tolerance.			
ES5. Smooth and shape your wood to a good standard using the sanding tools. Good standard = mostly smooth edges with no splinters, no jagged cuts (unless in the design).			
ES6. Add decoration to your photo holder neatly with minimal brushstrokes visible, paint in the right areas (according to design) and surface decoration such as wool/ribbon used effectively. Final piece looks <u>similar</u> to design.			
To achieve 'Greater Depth' you can ...		GD	
GD1. Research types of animals and accurately draw them in your booklet with a high level of detail and competent drawing style using colour appropriately.			
GD2. Design your photo holder using the full space on the page, with lots of detail in the drawing and colour added appropriately. Accurate measurements are given and annotations <u>clearly explain</u> each part of the design.			
GD3. Use the correct tools to draw a curved shape on a piece of wood and cut it out accurately (No tolerance).			
GD4. Smooth and shape your wood to a high standard using the sanding tools. High standard = All edges smoothed with no splinters, no jagged cuts (unless in the design).			
GD5. Add decoration to your photo holder neatly with no brushstrokes visible, paint only in the correct places (according to design) and surface decoration such as wool/ribbon used effectively. Final piece looks as it was designed in booklet.
