## Topic: Wild Weather

Working Towards	Expected Standard	Reaching Greater Depth
-----------------	-------------------	------------------------

To achieve 'Expected Standard' you will be able to....	WT	EP
ES1. I can define the term Weather and describe how weather can change daily		
ES2. I can understand how weather is measured and presented using tools and codes.		
ES3. I can understand the difference between altitude and latitude and their effect on climate and describe a climate graph		
ES4. I can use a climate graph to explain the climate of a country		
ES5. I can identify the causes and assess the impacts of climate change		
ES6. I can explain how rainfall occurs		
ES7. I can explain the 3 conditions needed for a Tropical Storm to occur		
ES8. I can assess the impacts of a tropical storm		
ES9. I can explain and assess the impacts of Typhoon Haiyan		
To achieve 'Greater Depth' you will be able to...	GD	
GD1. I can explain the difference between natural and enhanced Greenhouse Effect		
GD2. I can construct my own climate graph		
GD3. I can evaluate the influence of development on the impacts		
GD4. I can assess how human factors such as development can affect the severity of Tropical Storms		
GD5. I can evaluate responses to Tropical Storms
