Topic: Year 7 Unit 5 Databases

I should be working at:	ES	GD
-------------------------	----	----

Standard	Expected standard	Working towards
<i>ES1 I understand that data is stored in tables.</i>	You show a solid understanding of how data is organized in tables and can give examples to explain it.	You are starting to grasp how data is stored in tables and can point out some basic features, but need more practice.
<i>ES2 I can explain what a field and record is.</i>	You can clearly explain what fields and records are, and you provide examples to support your explanation.	You are beginning to understand fields and records and can identify some basic traits, but need more practice.
<i>ES3 I can explain the purpose of a form</i>	You can clearly explain why forms are used, including their functions and benefits, with examples.	You are starting to understand the purpose of forms and can identify some basic functions, but need more practice.
<i>ES4 I can use a filter, set criteria and design a query</i>	You can effectively use filters and set criteria to create clear queries that show a good understanding of how to design them.	You are starting to use filters and set basic criteria, but need more practice to improve your skills in query design.
<i>ES5 I can understand, create and explain the purpose of reports.</i>	You can understand, create, and explain the purpose of reports clearly, giving examples of different types.	You are beginning to understand what reports are for and can create basic ones, but need more practice.
<i>GD1 I can plan a database table, explain what a data type and select the appropriate data type for a field.</i>	You can plan a database table, explain data types, and choose the right types for fields with clear reasons.	You are starting to plan a database table and understand basic data types, but need more practice to choose the correct ones.

Standard	Expected standard	Working towards
<i>GD2 I can explain my form, and add features to the form such as a drop down list.</i>	You can clearly explain your form and add features like a drop-down list, explaining their benefits.	You are starting to explain your form and can add basic features, but need more practice to include more advanced ones.
<i>GD3 I can design a complex query, print the results to a report modified for the target audience.</i>	You can design complex queries and present the results in a report that is tailored for the target audience.	You are starting to design basic queries and can show results in a report, but need more practice to customize it for specific audiences.
