

Progress Page

Topic: Year 8 Unit 1 eSafety and Python

I should be working at:	ES	GD
-------------------------	----	----

Standard	Expected standard	Working towards
<i>ES1: I can name all of the flowchart symbols and explain what they are used for</i>	You can name and explain flowchart symbols accurately, showing a strong understanding of their purposes.	You can name and briefly explain some flowchart symbols, showing a basic understanding of what they do.
<i>ES2: I can explain what an input and print statement do and use them in my code</i>	You can clearly explain what input and print statements do and use them effectively in your coding.	You can describe the functions of input and print statements and use them in your code with some help.
<i>ES3: I can create variables and store data in them with the correct data type</i>	You can create variables and store data using mostly the correct data types, showing good understanding.	You can create variables and store data using some correct data types, showing a basic understanding.
<i>ES4: I can state what the different operators mean and use If statements and ELIF conditions</i>	You can explain the meanings of different operators and use If statements and ELIF conditions effectively in your code.	You can state the meanings of some operators and use If statements and ELIF conditions with some guidance.
<i>ES5: I can break down a problem into manageable smaller tasks and create working solutions to the problem</i>	You can break down problems into smaller tasks and create working solutions mostly on your own.	You can somewhat break down problems into smaller tasks and develop solutions with some help.
Standard	Greater depth met	Working towards greater depth
<i>GD1: I can break down a process and describe all of it in a flowchart</i>	You can break down a process and create a clear flowchart that mostly represents it accurately.	You can somewhat break down a process and make a basic flowchart with some guidance.
<i>GD2: I can write an input and print statement all by myself without any help</i>	You can write input and print statements mostly on your own with few mistakes.	You can write input and print statements with some help and support.

Standard	Expected standard	Working towards
<i>GD3: I can independently select the correct data type to use without any help</i>	You can mostly choose the correct data type for variables on your own with minor errors.	You can somewhat choose the correct data type with some guidance and support.
<i>GD4: I can create a working solution without any assistance and independently enhance the program</i>	You can create a working solution independently and make some improvements with minor guidance.	You can somewhat create a working solution with some guidance and support.
