

Geography Year 7- Africa

Key term	Definition
Diverse	In geography, a "diverse area" contains a broad mix of landscapes, climates, or people
Perception	How an individual views, understands, or feels about a place, issue, or environment.
Physical Features	Natural components of the Earth's surface that would exist without human interference.
Human Features	The aspects of a landscape or environment that have been made, built, or altered by people.
Climate	The long-term average pattern of weather conditions (such as temperature, rainfall, and wind)
Ecotourism	Responsible travel to natural areas that conserves the environment, minimizes ecological impact, and improves the well-being of local communities.
Sustainable	The practice of using natural resources and living in a way that meets current human needs without harming the environment.
Biomes	Large-scale, global ecosystems defined by their distinct climates, dominant vegetation, and the animal communities adapted to live there.
Piracy	The act of attacking and robbing a ship or vessel.
QR Code/link to revision website	A rolling green landscape scattered with shrubs and trees.

Mapping Africa:

There are many incorrect perceptions of Africa:

Tourism in Africa:

Ecotourism Safari Pyramids

Opportunities

Wildlife and Adventure

Culture

Job Creation

Development

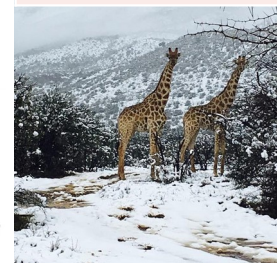

Challenges

Climate pressure

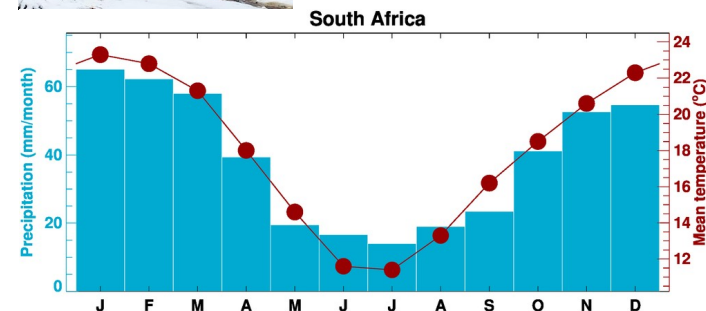

High Costs

Safety

Poverty

There is snow in Africa!

Mapping piracy in Africa:
